

# Uspenskiy Stepan

Hi!

I'm a FullStack .NET/Angular developer. I love both layout and backend tasks, solving complex problems and facing challenges without stopping to grow. I don't limit myself to my responsibility area and participates in the internal libraries and tools development.

## Technical stack

.NET:

- ASP.NET Core
- EF Core, Dapper
- PostgreSQL
- REST, OData, GraphQL (HotChocolate)
- SignalR (real-time)
- RabbitMQ
- Quartz
- HashiCorp Consul
- xUnit

Angular:

- Angular Material, PrimeNG
- rxJS
- Development according to layouts in Figma
- state management (NgRx)

Other tools: Docker, Swarm, GitLab & GitHub CI/CD, ElasticSearch, Nginx, Lit, Git.

I also actively apply such approaches as SOLID, DRY, KISS, CQRS, DDD, Event Sourcing to build scalable and fault-tolerant systems.

## Experience

### PJSC Europlan

Jan 2022 - present

I am engaged in the development of client and internal services, such as:

- Support chat (self-contained client component, integration with many internal services, providing realtime operation)
- Staff evaluation system. Refining and refactoring legacy project, rewriting frontend from react to angular, graphQL.

## Education

State Technical University—MADI (STU-MADI)

2023 - 2026

Bachelor's Degree - Automated Control Systems (Applied Informatics)

Plekhanov Russian University of Economics

2019 - 2023

Vocational education - Information systems and programming
